DEV GANDHI

Savannah, GA | gandhi.devv@gmail.com | linkedin.com/in/devgandhii | github.com/Dev-0206 | dev-0206.github.io

UX Design student at SCAD (BFA, expected 2028; transferred from the University of Washington's Human Centered Design & Engineering program). Experience in user research, journey mapping, prototyping in Figma, and physical and sustainable product design. Seeking a Summer 2027 design internship.

EDUCATION

Savannah College of Art and Design (SCAD), Savannah, GA Fall 2026 – Present
BFA, UX Design (expected 2028)

University of Washington, Seattle, WA 09/2023 – 04/2026
Human Centered Design & Engineering (transferred to SCAD)

SKILLS

Research & Design: User Interviews, Journey Mapping, Heuristic Evaluation, Prototyping, Figma, Brand Identity
3D & Making: Fusion 360, SolidWorks (basics), Rhino, KeyShot (learning), 3D Printing
Other: Microsoft Office (Word, Excel, PowerPoint), Python, Flask, HTML/CSS, Git, Product Management

PROJECTS

Focus Phone Stand – Research-Driven Product Design (team of 3, HCDE 315) Winter 2026
- Interviewed a student with ADHD (90 min), then co-mapped their day (30 min) and co-ideated solutions (60 min). Synthesized four insights and three design principles.
- Designed a phone stand that cues focus with a light. Storyboarded and sketched it, then tested it with the participant: 6/10 value, 8/10 usability, 10/10 feasibility, 8/10 desirability (n=1).
- Took interview notes and transcripts, documented milestones, and wrote the presentations and final report.

Second Spin – Circular Vinyl Record Reprint System (team of 4, HCDE 316) Autumn 2025
- Designed a service that collects damaged vinyl through record stores to be cleaned, repaired, or restamped instead of pressing new PVC.
- Built a life cycle assessment and impact model: about 80% lower CO■ than current production (360,161 to 71,084 kg for 705,549 records). It is a modeled estimate.
- Prototyped the service with scratched records, before-and-after audio, and an intake form. Ran a Wizard-of-Oz test with 6 classmates on price, convenience, and trust.

Molly Moon's Seasonal Flavors – Website Redesign + Design Brief (individual) Autumn 2025
- Redesigned the seasonal flavors experience in Figma: dietary-labeled flavor cards, a flavor detail page, a shop locator, and a color and type system.
- Changed the logo from an ice cream cup to a cone and revised the high-fidelity color palette after critique. Also made an in-store poster and wrote the design brief.

Vacation Helper – Python/Flask Web App · github.com/Dev-0206/Vacation-Helper HCDE 310
- Built an individual Flask app that ranks destinations by budget and trip length and shows the math behind each result, using a CSV of price estimates and live weather from OpenWeatherMap.
- Fixed a CSV parsing bug caused by unquoted commas and moved the API key into environment variables (python-dotenv).

EXPERIENCE

Student Athletic Field Staff | SCAD, Savannah, GA Sep 2026 – Present
On-campus student position supporting athletics field operations.

Founder & Project Lead | DIY Green School Initiative, India 2020 – 2023
- Started a school solar program: installed 50+ solar panels, raised about $10,000 in funding, and led workshops for over 200 students.

Rush Chair | Phi Kappa Sigma Fraternity, Seattle, WA Sep 2024 – Jan 2025
- Organized recruiting events that grew membership from 14 to 25 members; managed budgeting and logistics for activities involving 100+ members.

Data Entry Assistant | Guru Electrics, Gujarat, India Jun 2022 – Sep 2022
- Processed client data and invoices using SAP; assisted with client communications and administrative tasks.

LANGUAGES

Fluent in English, Hindi, and Gujarati
